Paper 3 Education

**May/June 2021**

MARK SCHEME

Maximum Mark: 50

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **9** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- (a) DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- (b) DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- (c) DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- (d) DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- (e) DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- (f) DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- (g) DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks
1	<p data-bbox="316 248 1225 315"><b>Describe two education policies designed to help disadvantaged groups.</b></p> <p data-bbox="316 349 571 383"><b>Indicative content</b></p> <ul data-bbox="316 421 1173 701" style="list-style-type: none"><li>• Extension of free education, compulsory schooling, university expansion</li><li>• Comprehensive schools, less streaming</li><li>• National Curriculum</li><li>• Schemes to encourage girls and boys to counter stereotypes</li><li>• Compensatory education programmes; EAZ, Sure Start,</li><li>• Social inclusion</li><li>• Any other relevant example</li></ul> <p data-bbox="316 734 1294 831"><b>Note:</b> Reward a maximum of two examples. For each example up to 2 marks are available:</p> <p data-bbox="316 869 1142 969">1 mark for identifying an example of an education policy 1 mark for showing understanding of how that policy could help disadvantaged groups.</p> <p data-bbox="316 1003 491 1037">(2 × 2 marks)</p>	4

Question	Answer	Marks
2	<p><b>Explain two ways in which cultural deprivation may affect educational attainment.</b></p> <p><b>Indicative content</b></p> <ul style="list-style-type: none"> <li>• Parents' lower level of education.</li> <li>• Restricted code and language difficulties.</li> <li>• Parental attitudes to education and work.</li> <li>• Subcultural values of fatalism, immediate gratification, etc.</li> <li>• Parents less able to help with schoolwork.</li> <li>• Parents lack familiarity with and understanding of the education system.</li> <li>• Any other relevant reason.</li> </ul> <p>Reward a maximum of two reasons. Up to 4 marks are available for each reason</p> <p>1 mark for making a point / identifying a reason (e.g. parents' lower level of education).</p> <p>1 mark for explaining that point/identifying a reason (e.g. parents with lower level of education less able to prepare children to perform well at school)</p> <p>1 mark for selecting relevant sociological material such as a study/concept/theory/empirical evidence to support the point (e.g. Feinstein showed parents' education key factor in child's achievement in all classes.)</p> <p>1 mark for explaining how the material supports the point (e.g. Parental education level related to consistent discipline, more reading, good relations with teachers, which all helped child's success in school.)</p> <p>(2 × 4 marks)</p>	8

Question	Answer	Marks
3	<p><b>‘Grouping by ability enables all pupils to have the most suitable education.’</b></p> <p><b>Using sociological material, give two arguments against this view.</b></p> <p><b>Indicative content</b></p> <ul style="list-style-type: none"> <li>• Testing may not be valid measure of potential, whether IQ, SATS, 11+, etc.</li> <li>• Perceived ability may be based on stereotyped views of class, gender or ethnicity, the ‘ideal pupil’, etc.</li> <li>• Streaming, setting or selective schools can negatively affect a pupil’s self-esteem, exclude from certain resources, affect how teachers treat them, etc.</li> <li>• There are social and educational benefits for all students of having mixed ability education.</li> <li>• Streaming can lead to formation of anti-school subcultures.</li> <li>• Any other relevant argument against the view</li> </ul> <p>Reward a maximum of two arguments. Up to 6 marks are available for each argument.</p> <p><b>Note:</b> This question is asking for arguments against the view. There are no marks for explaining the view or giving arguments supporting the view.</p> <p><b>Levels of response</b> Use the following levels to mark <b>each</b> argument.</p> <p><b>Level 3: 5–6 marks</b></p> <ul style="list-style-type: none"> <li>• One clear and developed argument against the view that testing and grouping by ability enables all pupils to have the most suitable education.</li> <li>• Sociological material, such as concepts, theories and evidence, is used to support the argument against the view. The material selected is appropriate and focused on the question with its relevance made clear.</li> </ul> <p><b>Level 2: 3–4 marks</b></p> <ul style="list-style-type: none"> <li>• One clear but underdeveloped argument against the view that testing and grouping by ability enables all pupils to have the most suitable education.</li> <li>• The material selected is appropriate but not fully focused on the question. Sociological evidence is used but its relevance to the argument is not made clear.</li> </ul> <p><b>Level 1: 1–2 marks</b></p> <ul style="list-style-type: none"> <li>• One point disagreeing with the view that testing and grouping by ability enables all pupils to have the most suitable education which is undeveloped or lacking clarity.</li> <li>• Any material selected lacks focus on the specific question.</li> </ul> <p><b>Level 0: 0 marks</b></p> <ul style="list-style-type: none"> <li>• No response worthy of credit.</li> </ul>	12

Question	Answer		Marks
4	<b>Evaluate the view that gender is the most important influence on educational attainment.</b>		<b>26</b>
<b>Indicative content</b>			
			Against
Points	<ul style="list-style-type: none"> <li>• Statistics on attainment differences, especially GCSE</li> <li>• Patriarchal culture and feminism</li> <li>• Outside influences on girls; family, media, occupational structure</li> <li>• Outside influences on boys: language, crisis in masculinity</li> <li>• In-school factors: feminisation of education, subjects and gender domains</li> <li>• Male and female subcultures</li> </ul>	<ul style="list-style-type: none"> <li>• Comparative statistics of class and ethnic differences in attainment</li> <li>• Cultural changes – less stereotypical media images, role-models</li> <li>• Economic changes – occupations available</li> <li>• Political changes – equal opportunities legislation</li> <li>• Equalised access to curriculum</li> <li>• Pro and anti-school subcultures affect both genders</li> <li>• Explanations of why class and ethnicity may lead to greater inequalities in attainment</li> <li>• Large variations between nations</li> </ul>	
Research evidence	Sharpe, O'Connor, Mitsos and Browne, Sewell, Francis, Slee, Weiner	Gorard, Weiner, Archer, Evans, Ringrose, Osler, McVeigh	
Concepts	Patriarchy, Gendered socialisation, Role-models, Feminised curriculum	Material and cultural deprivation, Equality of opportunity	
<p>The above content is indicative and other relevant approaches to the question should be rewarded appropriately.</p>			

**Question 4 levels of response****Level 5: 22–26 marks**

- Very good knowledge and understanding of the view that gender is the most important influence on educational attainment. The response contains a wide range of detailed points with very good use of concepts and theory/research evidence.
- The material selected will be accurately interpreted, well developed and consistently applied to answering the question.
- Clear and sustained analysis with detailed and explicit evaluation of the view that gender is the most important influence on educational attainment.

**Level 4: 17–21 marks**

- Good knowledge and understanding of the view that gender is the most important influence on educational attainment. The response contains a range of detailed points with good use of concepts and theory/research evidence.
- The material selected will be accurate and relevant but not always consistently applied to answering the question.
- Good analysis/evaluation of the view that gender is the most important influence on educational attainment. This may be explicit and direct but not sustained, or it will rely on a good account of other factors influencing educational achievement.

**Level 3: 11–16 marks**

- Reasonable knowledge and understanding of the view that gender is the most important influence on educational attainment. The response contains a narrow range of detailed points or a wider range of underdeveloped points, with some use of concepts or theory or research evidence.
- The material selected will be largely appropriate but its relevance to the question may be unclear or confused at times.
- Some analysis/evaluation of the view that gender is the most important influence on educational attainment. This may be one point explicitly used to argue for or against the view that gender is the most important influence on educational attainment or a simple descriptive account of other factors influencing educational attainment.

**Level 2: 6–10 marks**

- Basic knowledge and understanding of the view that gender is the most important influence on educational attainment. The response contains a narrow range of underdeveloped points and may include basic references to concepts or theories or research evidence.
- The material selected is relevant to the topic but lacks focus on or relevance to the specific question.
- Any analysis or evaluation is likely to be incidental, confused or simply assertive.

**Level 1: 1–5 marks**

- Limited knowledge and understanding of the view that gender is the most important influence on educational attainment. The response contains only assertive points or common-sense observations.
- There is little or no application of sociological material.
- Little or no relevant analysis or evaluation.

**Level 0: 0 marks**

No response worthy of credit.
