Paper 3 Destination Marketing

October/November 2023

MARK SCHEME

Maximum Mark: 50

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2023 series for most Cambridge IGCSE, Cambridge International A and AS Level components, and some Cambridge O Level components.

This document consists of **16** printed pages.

PUBLISHED**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

PUBLISHED**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Science-Specific Marking Principles

1	Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.
2	The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.
3	Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).
4	The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.
5	<p><u>'List rule' guidance</u></p> <p>For questions that require <i>n</i> responses (e.g. State two reasons ...):</p> <ul style="list-style-type: none">• The response should be read as continuous prose, even when numbered answer spaces are provided.• Any response marked <i>ignore</i> in the mark scheme should not count towards <i>n</i>.• Incorrect responses should not be awarded credit but will still count towards <i>n</i>.• Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should not be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response.• Non-contradictory responses after the first <i>n</i> responses may be ignored even if they include incorrect science.

6 Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form (e.g. $a \times 10^n$) in which the convention of restricting the value of the coefficient (a) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

7 Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

PUBLISHED**9395 Travel and Tourism – Paper 3 Annotations**

Annotation	Description	Use
	Tick	Indicates a point which is relevant and rewardable.
	Tick+	Development of point
	Cross	Indicates a point which is inaccurate/irrelevant and not rewardable.
	Question mark	Used when anything written in response is unclear.
	BP	Blank Page
	Vague	Indicates a point is vague.
	Highlight	Used to highlight a piece of text.
	Benefit of doubt	Used when the benefit of the doubt is given in order to reward a response.
	Not answered question	Used when the answer or parts of the answer are not answering the question asked.
	Noted but no credit given	Indicates that content has been recognised but not rewarded.
	Repetition	Indicates where content has been repeated.
	Level 1	Indicates a Level 1 point is made.

PUBLISHED

 L2	Level 2	Indicates a Level 2 point is made.
 L3	Level 3	Indicates a Level 3 point is made.
	Off Page Comment	Used to add comments to responses – displayed at the bottom of the screen when clicking the comments button/toggle.

Question	Answer	Marks
1(c)	<p>Evaluate the challenges the Nation Brand Office is likely to face in branding the UAE for the first time.</p> <p>Candidates should be familiar with the range of challenges from destination branding</p> <p>Responses may include the following and/or other relevant information:</p> <p>Mark according to the levels of response criteria below:</p> <ul style="list-style-type: none"> • A destination is made up of composite products, not just one product – 7 Emirates each with their own identity • Intangibility of the tourism offering – only those who visit can really experience what they destination has to offer – UAE must find a way to market themselves so that potential visitors know what to expect • The destination’s reputation and image are not created by the destination management organisations in charge of its marketing and promotion – bias and different viewpoints. The UAE is not clearly understood as being ONE nation – people do not necessarily have a clear image. The country’s political reputation may not be well known • UAE has a diverse range of organisations and partners involved in crafting and delivering the brand – this is open to inconsistency of brand message. Each of the 7 emirates must work together to reinforce the one brand message • Lack of funding for marketing efforts – marketing is expensive – the UAE is a financially stable country but each emirate must contribute towards the national marketing budget to help successfully brand the country • UAE has never had a national brand previously – so it may be difficult to implement and make a unique identity stick – other people may already be familiar with other logos already in use across each of the individual emirates. This may cause competition • Destination image is affected by natural disasters, political unrest, acts of terrorism and other social, economic and political factors – political and economic stability, as well as the pandemic threaten any destination’s success – UAE is likely to be affected by this as much as any other destination and must work collectively to manage the negative impacts through their marketing efforts <p>Level 3 (9–12 marks)</p> <p>Candidates provide an evaluation of the challenges the Nation Brand Office is likely to face in branding the UAE for the first time. There is sound and frequent evidence of thorough, detailed and accurate knowledge and understanding of concepts and principles, using appropriate terminology. There will be good reference to the case study.</p>	12

Question	Answer	Marks
2(c)	<p>Evaluate the range of KPIs which are most useful in measuring the brand success of Nebraska’s destination brand.</p> <p>Candidates will be familiar with the list of KPIs – they must select the ones they think most appropriate for Nebraska</p> <ul style="list-style-type: none"> • Destination popularity ranking – given the negative press that Nebraska receives, it will be interesting to see if this campaign increases the ranking or not • Changes in arrival numbers – easy to draw comparisons and to track any patterns or trends–Nebraska can monitor their arrivals to see if the campaign has positively or negatively affected visitor arrivals • Changes in visitor spend – this is especially important for Nebraska – it will show if people are willing to spend on visiting attractions and activities which were previously heavily criticised for the area • Changes in average length of stay – this will show if perceptions of Nebraska have changed and whether people are willing to spend longer in the area they described as boring • Changes in occupancy rates – useful data for comparison with pre-campaign data • Job creation within the tourism sector – the campaign did not set out to increase employment in Nebraska, only to change stereotypes of the destination • Changes in market share – how the destination stands with competitors – maybe someone will now put Nebraska on their bucket list • Brand awareness – raising the profile of Nebraska with visitors is important, not just locally but also nationally and internationally. This can be measured through perception surveys pre and post arrival • Return on investments (ROI) – not a targeted aim for Nebraska with this campaign • New/repeat business – this will tie in with improved brand awareness for Nebraska – drawing visitors back will be a good indicator if the campaign has been successful <p>Level 3 (9–12 marks)</p> <p>Candidates provide an evaluation of the range of KPIs which are most useful in measuring the brand success of Nebraska’s destination brand. There is sound and frequent evidence of thorough, detailed and accurate knowledge and understanding of concepts and principles, using appropriate terminology as well as specific reference to the case study</p>	12
